

Disaster Recovery (DR) Solutions

When imaging systems fail, patient care can't wait.

AdvaPACS Disaster Recovery keeps your imaging services online without additional hardware or infrastructure.

Secure cloud disaster recovery. Ready when you need it.

AdvaPACS works alongside your existing PACS environment, providing secure cloud-based disaster recovery without system migration, additional infrastructure, or operational disruption.

Your data. Instantly available

Securely stored in AWS and ready for rapid recovery. Restore access independently, without relying on your PACS vendor.

Vendor-neutral by design

Standards-based and interoperable. No proprietary formats or vendor lock-in. Your data remains under your control.

Scales without limits

Expand storage and recovery capacity as your imaging volumes grow, without hardware refreshes or unexpected costs.

No hardware. No upfront fees

Eliminate infrastructure costs and pay only for the capacity you use.
